| Category | Description | Reviewers Comment | Action taken by reviewed group |
|---|---|---|---|
| Build | Could you clone from Git and build using the README file? | Was able to download and build code. I lacked the hardware to fully test application. Readme was concise and straight forward. | N/A |
| Legibility | Was the flow sane and were variable names and methods easy to follow? Does the code adhere to general guidelines and code style? | good conventions. Variables and functions have different name conventions and a generous use of white space for readability. | N/A |
| Implementation | is it shorter/easier/faster/cleaner/safer to write functionally equivalent code? Do you see useful abstractions? | Home.Xaml.cs may benefit from Modularization. It might make DcSWMonitorApp easier to understand. | New functions added to split up Home.xaml.cs |
| Maintainability | Are there unit tests? Should there be? Are the test covering interesting cases? Are they readable? | No unit tests | Discussed with Scott prior to code review. Unit Tests are not feasible for our project and how we take in input |
| Requirements | Does the code fulfill the requirements? | Code fullfills requirements | N/A |
| Other | Are there other things that stand out that can be improved? | None. | N/A |
